# Chapter 1

## Graph API

### 1.1 Install requirements

Make sure you are in the graph folder and Python installed.

```
cd graph  
pip install -r requirements.txt
```

### 1.2 Run mock server

```
uvicorn graph_sample:graphAPI
```

You will be able to access the mock server and test the API at <http://127.0.0.1:8000/docs>

## Chapter 2

# Sistema de seguimiento de Alumnos

TODO: Descripción del sistema

## 2.1 Instalación para desarrollo

Instala [Laragon](#).

Suponiendo que se utilizó el directorio por defecto durante la instalación, crear un archivo llamado `sistema-seguimiento-alumnos.conf` en el directorio `C:\laragon\etc\apache2\sites-enabled\` con el siguiente contenido:

```
<VirtualHost *:80>
    DocumentRoot "C:\PATH\TO\PROJECT\public"
    ServerName sistema-seguimiento.test
    ServerAlias *.sistema-seguimiento.test
    <Directory "C:\PATH\TO\PROJECT\public">
        AllowOverride All
        Require all granted
    </Directory>
</VirtualHost>
```

`C:\PATH\TO\PROJECT` debe sustituirse por el directorio del proyecto.

Después de reiniciar Laragon, se deben ejecutar los siguientes comandos:

```
composer install
copy .env.example .env
php artisan key:generate
```

En la base de datos de laragon (HeidiSQL), crear una base de datos llamada 'saa', correr migraciones y servir.

```
php artisan migrate:fresh
php artisan serve
```

En la terminal de laragon ingresar el comando:

```
composer require laravel/ui
```

En el archivo `vendor/laravel/ui/auth-backend/AuthenticatesUsers.php` linea 157 modificar 'email' por 'username'

## 2.2 Iniciar Servidor Python

Si es la primera vez que se ejecuta el servidor, se debe crear un entorno virtual de python y activarlo. Para esto, se debe ejecutar el siguiente comando en la carpeta del proyecto:

```
python -m venv .venv
```

### 2.2.1 Activar entorno virtual

**Windows Powershell:**

```
& .\venv\Scripts\Activate.ps1
```

**Windows CMD:**

```
.\venv\Scripts\activate.bat
```

**Linux/MacOS:**

```
source .\venv\bin\activate
```

### 2.2.2 Instalar dependencias

```
pip install -r graph/requirements.txt
```

### 2.2.3 Ejecutar servidor

```
uvicorn graph.graph_api:graphAPI
```

# Chapter 3

## Namespace Index

### 3.1 Namespace List

Here is a list of all namespaces with brief descriptions:

App\Console	15
App\Exceptions	15
App\Http	15
App\Http\Controllers	15
App\Http\Controllers\Auth	16
App\Http\Middleware	16
App\Imports	17
App\Models	17
App\Providers	17
Database\Factories	17
Database\Seeders	17
graph	18
graph.dash_api	18
graph.graph_api	19
Illuminate\Foundation\Auth	21
Laravel	26
test_graph_api	26
test_graph_creation	26
Tests	27
Tests\Feature	27
Tests\Unit	27

# Chapter 4

## Hierarchical Index

### 4.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

Authenticatable	
App\Models\User	86
BaseController	
App\Http\Controllers\Controller	37
App\Http\Controllers\Auth\ConfirmPasswordController	35
App\Http\Controllers\Auth\ForgotPasswordController	57
App\Http\Controllers\Auth\LoginController	69
App\Http\Controllers\Auth\RegisterController	72
App\Http\Controllers\Auth\ResetPasswordController	74
App\Http\Controllers\Auth\VerificationController	91
App\Http\Controllers\CSVController	49
App\Http\Controllers\CareerController	33
App\Http\Controllers\ConsultController	36
App\Http\Controllers\DataController	53
App\Http\Controllers\FileController	57
App\Http\Controllers\GenerationController	58
App\Http\Controllers\GraphsController	61
App\Http\Controllers\HomeController	66
App\Http\Controllers\QueryController	71
App\Http\Controllers\SemesterController	81
App\Http\Controllers\StudentController	83
App\Http\Controllers\UserController	88
BaseTestCase	
Tests\TestCase	83
Tests\Feature\ExampleTest	55
App\Http\Middleware\CheckRole	34
ConsoleKernel	
App\Console\Kernel	66
ExceptionHandler	
App\Exceptions\Handler	64
HttpKernel	
App\Http\Kernel	67

# Chapter 7

## Namespace Documentation

### 7.1 App\Console Namespace Reference

#### Classes

- class [Kernel](#)

### 7.2 App\Exceptions Namespace Reference

#### Classes

- class [Handler](#)

### 7.3 App\Http Namespace Reference

#### Namespaces

- namespace [Controllers](#)
- namespace [Middleware](#)

#### Classes

- class [Kernel](#)

### 7.4 App\Http\Controllers Namespace Reference

#### Namespaces

- namespace [Auth](#)

## Classes

- class [CareerController](#)
- class [ConsultController](#)
- class [Controller](#)
- class [CSVController](#)
- class [DataController](#)
- class [FileController](#)
- class [GenerationController](#)
- class [GraphsController](#)
- class [HomeController](#)
- class [QueryController](#)
- class [SemesterController](#)
- class [StudentController](#)
- class [UserController](#)

## Functions

- [check\\_value \(\\$v\)](#)

### 7.4.1 Function Documentation

#### 7.4.1.1 [check\\_value\(\)](#)

```
App\Http\Controllers\check_value (
    $v )
```

## 7.5 App\Http\Controllers\Auth Namespace Reference

## Classes

- class [ConfirmPasswordController](#)
- class [ForgotPasswordController](#)
- class [LoginController](#)
- class [RegisterController](#)
- class [ResetPasswordController](#)
- class [VerificationController](#)

## 7.6 App\Http\Middleware Namespace Reference

## Classes

- class [Authenticate](#)
- class [CheckRole](#)
- class [EncryptCookies](#)
- class [PreventRequestsDuringMaintenance](#)
- class [RedirectIfAuthenticated](#)
- class [TrimStrings](#)
- class [TrustHosts](#)
- class [TrustProxies](#)
- class [VerifyCsrfToken](#)

## 7.7 App\Imports Namespace Reference

### Classes

- class [CSVImport](#)

## 7.8 App\Models Namespace Reference

### Classes

- class [Career](#)
- class [CSV](#)
- class [Data](#)
- class [File](#)
- class [Role](#)
- class [RoleUser](#)
- class [Semester](#)
- class [Student](#)
- class [User](#)

## 7.9 App\Providers Namespace Reference

### Classes

- class [AppServiceProvider](#)
- class [AuthServiceProvider](#)
- class [BroadcastServiceProvider](#)
- class [EventServiceProvider](#)
- class [RouteServiceProvider](#)

## 7.10 Database\Factories Namespace Reference

### Classes

- class [UserFactory](#)

## 7.11 Database\Seeders Namespace Reference

### Classes

- class [DatabaseSeeder](#)
- class [RoleSeeder](#)
- class [UserSeeder](#)

## 7.12 graph Namespace Reference

### Namespaces

- namespace [dash\\_api](#)
- namespace [graph\\_api](#)

## 7.13 graph.dash\_api Namespace Reference

### Variables

- [app](#) = Dash(\_\_name\_\_)
- [df](#)
- [fig](#) = px.bar([df](#), x="Fruit", y="Amount", color="City", barmode="group")
- [layout](#)
- [children](#)
- [debug](#)

#### 7.13.1 Variable Documentation

##### 7.13.1.1 app

```
graph.dash_api.app = Dash(__name__)
```

##### 7.13.1.2 children

```
graph.dash_api.children
```

##### 7.13.1.3 debug

```
graph.dash_api.debug
```

### 7.13.1.4 df

```
graph.dash_api.df
```

**Initial value:**

```
1 = pd.DataFrame(  
2     {  
3         "Fruit": ["Apples", "Oranges", "Bananas", "Apples", "Oranges", "Bananas"],  
4         "Amount": [4, 1, 2, 2, 4, 5],  
5         "City": ["SF", "SF", "SF", "Montreal", "Montreal", "Montreal"],  
6     }  
7 )
```

### 7.13.1.5 fig

```
graph.dash_api.fig = px.bar(df, x="Fruit", y="Amount", color="City", barmode="group")
```

### 7.13.1.6 layout

```
graph.dash_api.layout
```

## 7.14 graph.graph\_api Namespace Reference

### Classes

- class [Student](#)
- class [StudentList](#)

### Functions

- def [root\(\)](#)
- pd.DataFrame [get\\_dataframe](#) ([StudentList](#) student\_list)
- def [scatter\\_plot](#) ([StudentList](#) data)
- def [bar\\_plot](#) ([StudentList](#) data)

### Variables

- [graphAPI](#) = FastAPI()
- [allow\\_origins](#)
- [allow\\_credentials](#)
- [allow\\_methods](#)
- [allow\\_headers](#)

### 7.14.1 Function Documentation

#### 7.14.1.1 bar\_plot()

```
def graph.graph_api.bar_plot (
    StudentList data )
```

#### 7.14.1.2 get\_dataframe()

```
pd.DataFrame graph.graph_api.get_dataframe (
    StudentList student_list )
```

#### 7.14.1.3 root()

```
def graph.graph_api.root ( )
```

Return the documentation of the API.

#### 7.14.1.4 scatter\_plot()

```
def graph.graph_api.scatter_plot (
    StudentList data )
```

### 7.14.2 Variable Documentation

#### 7.14.2.1 allow\_credentials

```
graph.graph_api.allow_credentials
```

#### 7.14.2.2 allow\_headers

```
graph.graph_api.allow_headers
```

#### 7.14.2.3 allow\_methods

```
graph.graph_api.allow_methods
```

#### 7.14.2.4 allow\_origins

```
graph.graph_api.allow_origins
```

#### 7.14.2.5 graphAPI

```
graph.graph_api.graphAPI = FastAPI()
```

## 7.15 Illuminate\Foundation\Auth Namespace Reference

### Functions

- [showLoginForm \(\)](#)
- [login \(Request \\$request\)](#)
- [validateLogin \(Request \\$request\)](#)
- [attemptLogin \(Request \\$request\)](#)
- [credentials \(Request \\$request\)](#)
- [sendLoginResponse \(Request \\$request\)](#)
- [authenticated \(Request \\$request, \\$user\)](#)
- [sendFailedLoginResponse \(Request \\$request\)](#)
- [username \(\)](#)
- [logout \(Request \\$request\)](#)
- [loggedOut \(Request \\$request\)](#)
- [guard \(\)](#)

### Variables

- trait [AuthenticatesUsers](#)

#### 7.15.1 Function Documentation

##### 7.15.1.1 attemptLogin()

```
Illuminate\Foundation\Auth\attemptLogin (
    Request $request ) [protected]
```

Attempt to log the user into the application.

**Parameters**

\Illuminate\Http\Request	\$request	<input type="button" value=""/>
--------------------------	-----------	---------------------------------

**Returns**

bool

**7.15.1.2 authenticated()**

```
Illuminate\Foundation\Auth\authenticated (
    Request $request,
    $user ) [protected]
```

The user has been authenticated.

**Parameters**

\Illuminate\Http\Request	\$request	<input type="button" value=""/>
mixed	\$user	<input type="button" value=""/>

**Returns**

mixed

**7.15.1.3 credentials()**

```
Illuminate\Foundation\Auth\credentials (
    Request $request ) [protected]
```

Get the needed authorization credentials from the request.

**Parameters**

\Illuminate\Http\Request	\$request	<input type="button" value=""/>
--------------------------	-----------	---------------------------------

**Returns**

array

#### 7.15.1.4 guard()

```
Illuminate\Foundation\Auth\guard ( ) [protected]
```

Get the guard to be used during authentication.

##### Returns

```
\Illuminate\Contracts\Auth\StatefulGuard
```

#### 7.15.1.5 loggedOut()

```
Illuminate\Foundation\Auth\loggedOut (
    Request $request ) [protected]
```

The user has logged out of the application.

##### Parameters

\Illuminate\Http\Request	\$request	<input type="button" value=""/>
--------------------------	-----------	---------------------------------

##### Returns

mixed

#### 7.15.1.6 login()

```
Illuminate\Foundation\Auth\login (
    Request $request )
```

Handle a login request to the application.

##### Parameters

\Illuminate\Http\Request	\$request	<input type="button" value=""/>
--------------------------	-----------	---------------------------------

##### Returns

```
\Illuminate\Http\RedirectResponse|\Illuminate\Http\Response|\Illuminate\Http\JsonResponse
```

##### Exceptions

<input type="button" value=""/>	<input type="button" value=""/>
---------------------------------	---------------------------------

`Illuminate\Validation\ValidationException`

#### 7.15.1.7 `logout()`

```
Illuminate\Foundation\Auth\logout (  
    Request $request )
```

Log the user out of the application.

##### Parameters

<code>\Illuminate\Http\Request</code>	<code>\$request</code>	<input type="button" value=""/>
---------------------------------------	------------------------	---------------------------------

##### Returns

`\Illuminate\Http\RedirectResponse|\Illuminate\Http\JsonResponse`

#### 7.15.1.8 `sendFailedLoginResponse()`

```
Illuminate\Foundation\Auth\sendFailedLoginResponse (  
    Request $request ) [protected]
```

Get the failed login response instance.

##### Parameters

<code>\Illuminate\Http\Request</code>	<code>\$request</code>	<input type="button" value=""/>
---------------------------------------	------------------------	---------------------------------

##### Returns

`\Symfony\Component\HttpFoundation\Response`

##### Exceptions

<input type="button" value=""/>	<input type="button" value=""/>
---------------------------------	---------------------------------

`Illuminate\Validation\ValidationException`

#### 7.15.1.9 `sendLoginResponse()`

```
Illuminate\Foundation\Auth\sendLoginResponse (  
    Request $request ) [protected]
```

Send the response after the user was authenticated.

**Parameters**

\Illuminate\Http\Request	\$request	<input type="button" value=" "/>
--------------------------	-----------	----------------------------------

**Returns**

\Illuminate\Http\RedirectResponse|\Illuminate\Http\JsonResponse

**7.15.1.10 showLoginForm()**

Illuminate\Foundation\Auth\showLoginForm ( )

Show the application's login form.

**Returns**

\Illuminate\View\View

**7.15.1.11 username()**

Illuminate\Foundation\Auth\username ( )

Get the login username to be used by the controller.

**Returns**

string

**7.15.1.12 validateLogin()**Illuminate\Foundation\Auth\validateLogin (  
Request \$request ) [protected]

Validate the user login request.

**Parameters**

\Illuminate\Http\Request	\$request	<input type="button" value=" "/>
--------------------------	-----------	----------------------------------

**Returns**

void

**Exceptions**

Illuminate\Validation\ValidationException

## 7.15.2 Variable Documentation

### 7.15.2.1 AuthenticatesUsers

```
trait Illuminate::Foundation::Auth\AuthenticatesUsers
```

**Initial value:**

```
{  
    use RedirectsUsers, ThrottlesLogins
```

## 7.16 Laravel Namespace Reference

### 7.16.1 Detailed Description

Laravel - A PHP Framework For Web Artisans

**Author**

Taylor Otwell [taylor@laravel.com](mailto:taylor@laravel.com)

## 7.17 test\_graph\_api Namespace Reference

**Classes**

- class [GraphsAPI](#)

## 7.18 test\_graph\_creation Namespace Reference

**Classes**

- class [GraphsAPI](#)

## 7.19 Tests Namespace Reference

### Namespaces

- namespace [Feature](#)
- namespace [Unit](#)

### Classes

- class [TestCase](#)

## 7.20 Tests\Feature Namespace Reference

### Classes

- class [ExampleTest](#)

## 7.21 Tests\Unit Namespace Reference

### Classes

- class [ExampleTest](#)

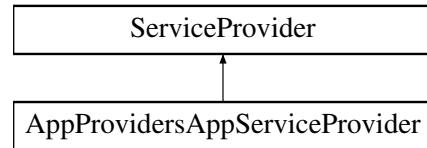

# Chapter 8

## Class Documentation

### 8.1 App\Providers\AppServiceProvider Class Reference

Inheritance diagram for App\Providers\AppServiceProvider:

#### Public Member Functions

- [register\(\)](#)
- [boot\(\)](#)

##### 8.1.1 Member Function Documentation

###### 8.1.1.1 boot()

`App\Providers\AppServiceProvider::boot( )`

Bootstrap any application services.

###### Returns

`void`

### 8.1.1.2 register()

```
App\Providers\AppServiceProvider::register ( )
```

Register any application services.

#### Returns

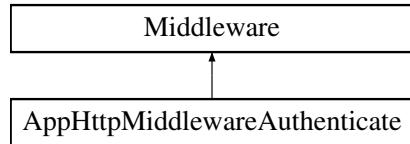

void

The documentation for this class was generated from the following file:

- app/Providers/AppServiceProvider.php

## 8.2 App\Http\Middleware\Authenticate Class Reference

Inheritance diagram for App\Http\Middleware\Authenticate:

### Protected Member Functions

- [redirectTo \(\\$request\)](#)

#### 8.2.1 Member Function Documentation

##### 8.2.1.1 redirectTo()

```
App\Http\Middleware\Authenticate::redirectTo (
    $request ) [protected]
```

Get the path the user should be redirected to when they are not authenticated.

#### Parameters

\Illuminate\Http\Request	\$request	<input type="button" value=" "/>
--------------------------	-----------	----------------------------------

Returns

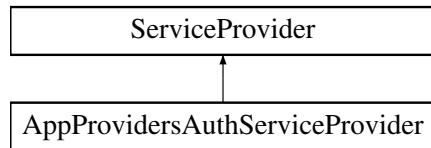

string|null

The documentation for this class was generated from the following file:

- app/Http/Middleware/Authenticate.php

## 8.3 App\Providers\AuthServiceProvider Class Reference

Inheritance diagram for App\Providers\AuthServiceProvider:

### Public Member Functions

- [boot \(\)](#)

### Protected Attributes

- [\\$policies](#)

#### 8.3.1 Member Function Documentation

##### 8.3.1.1 boot()

`App\Providers\AuthServiceProvider::boot ( )`

Register any authentication / authorization services.

Returns

void

#### 8.3.2 Member Data Documentation

### 8.3.2.1 \$policies

```
App\Providers\AuthServiceProvider::$policies [protected]
```

**Initial value:**

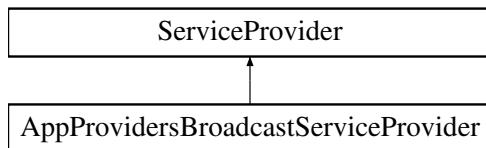

```
= [  
]
```

The documentation for this class was generated from the following file:

- app/Providers/AuthServiceProvider.php

## 8.4 App\Providers\BroadcastServiceProvider Class Reference

Inheritance diagram for App\Providers\BroadcastServiceProvider:

### Public Member Functions

- [boot\(\)](#)

#### 8.4.1 Member Function Documentation

##### 8.4.1.1 [boot\(\)](#)

```
App\Providers\BroadcastServiceProvider::boot( )
```

Bootstrap any application services.

**Returns**

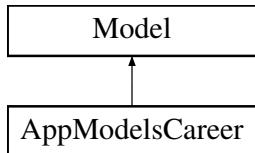

```
void
```

The documentation for this class was generated from the following file:

- app/Providers/BroadcastServiceProvider.php

## 8.5 App\Models\Career Class Reference

Inheritance diagram for App\Models\Career:

### Protected Attributes

- `$fillable = ['name']`
- `$hidden = ['created_at', 'updated_at', 'deleted_at']`

#### 8.5.1 Member Data Documentation

##### 8.5.1.1 \$fillable

```
App\Models\Career::$fillable = ['name'] [protected]
```

##### 8.5.1.2 \$hidden

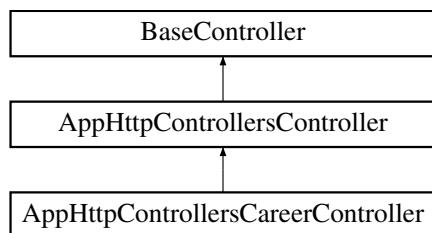

```
App\Models\Career::$hidden = ['created_at', 'updated_at', 'deleted_at'] [protected]
```

The documentation for this class was generated from the following file:

- app/Models/Career.php

## 8.6 App\Http\Controllers\CareerController Class Reference

Inheritance diagram for App\Http\Controllers\CareerController:

## Public Member Functions

- [loadCareer](#) (Request \$request)

### 8.6.1 Member Function Documentation

#### 8.6.1.1 [loadCareer\(\)](#)

```
App\Http\Controllers\CareerController::loadCareer (
    Request $request )
```

The documentation for this class was generated from the following file:

- app/Http/Controllers/[CareerController.php](#)

## 8.7 App\Http\Middleware\CheckRole Class Reference

## Public Member Functions

- [handle](#) (Request \$request, Closure \$next,... \$roles)

### 8.7.1 Member Function Documentation

#### 8.7.1.1 [handle\(\)](#)

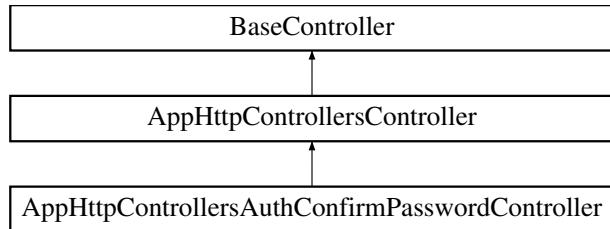

```
App\Http\Middleware\CheckRole::handle (
    Request $request,
    Closure $next,
    $roles )
```

The documentation for this class was generated from the following file:

- app/Http/Middleware/[CheckRole.php](#)

## 8.8 App\Http\Controllers\Auth\ConfirmPasswordController Class Reference

Inheritance diagram for App\Http\Controllers\Auth\ConfirmPasswordController:

### Public Member Functions

- [\\_\\_construct \(\)](#)

### Protected Attributes

- `$redirectTo = RouteServiceProvider::HOME`

#### 8.8.1 Constructor & Destructor Documentation

##### 8.8.1.1 \_\_construct()

`App\Http\Controllers\Auth\ConfirmPasswordController::__construct ( )`

Crear nueva instancia del controlador

Returns

`void`

#### 8.8.2 Member Data Documentation

##### 8.8.2.1 \$redirectTo

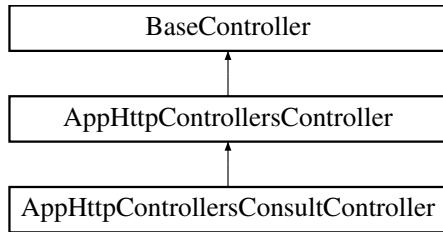

`App\Http\Controllers\Auth\ConfirmPasswordController::$redirectTo = RouteServiceProvider::HOME`  
[protected]

The documentation for this class was generated from the following file:

- [app/Http/Controllers/Auth/ConfirmPasswordController.php](#)

## 8.9 App\Http\Controllers\ConsultController Class Reference

Inheritance diagram for App\Http\Controllers\ConsultController:

### Public Member Functions

- [`\_\_construct\(\)`](#)
- [`index \(Request \$request\)`](#)
- [`loadSemester \(Request \$request\)`](#)
- [`test \(Request \$request\)`](#)

#### 8.9.1 Constructor & Destructor Documentation

##### 8.9.1.1 `__construct()`

```
App\Http\Controllers\ConsultController::__construct ( )
```

#### 8.9.2 Member Function Documentation

##### 8.9.2.1 `index()`

```
App\Http\Controllers\ConsultController::index (
    Request $request )
```

##### 8.9.2.2 `loadSemester()`

```
App\Http\Controllers\ConsultController::loadSemester (
    Request $request )
```

### 8.9.2.3 test()

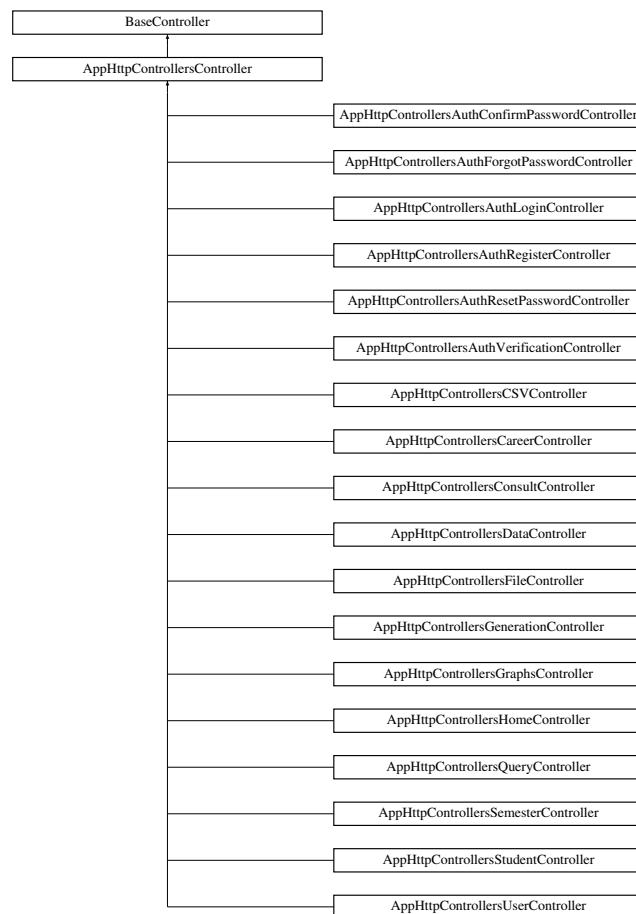

```
App\Http\Controllers\ConsultController::test (
    Request $request )
```

The documentation for this class was generated from the following file:

- app/Http/Controllers/[ConsultController.php](#)

## 8.10 App\Http\Controllers\Controller Class Reference

Inheritance diagram for App\Http\Controllers\Controller:

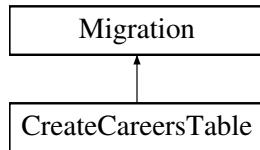

The documentation for this class was generated from the following file:

- app/Http/Controllers/[Controller.php](#)

## 8.11 CreateCareersTable Class Reference

Inheritance diagram for CreateCareersTable:

### Public Member Functions

- [up \(\)](#)
- [down \(\)](#)

#### 8.11.1 Member Function Documentation

##### 8.11.1.1 [down\(\)](#)

`CreateCareersTable::down ( )`

Reverse the migrations.

Returns

`void`

##### 8.11.1.2 [up\(\)](#)

`CreateCareersTable::up ( )`

Run the migrations.

Returns

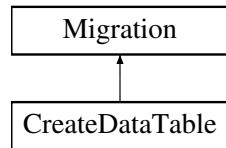

`void`

The documentation for this class was generated from the following file:

- [database/migrations/2022\\_08\\_18\\_181913\\_create\\_careers\\_table.php](#)

## 8.12 CreateDataTable Class Reference

Inheritance diagram for CreateDataTable:

### Public Member Functions

- [up \(\)](#)
- [down \(\)](#)

#### 8.12.1 Member Function Documentation

##### 8.12.1.1 down()

`CreateDataTable::down ( )`

Reverse the migrations.

Returns

`void`

##### 8.12.1.2 up()

`CreateDataTable::up ( )`

Run the migrations.

Returns

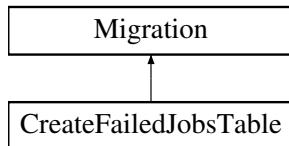

`void`

The documentation for this class was generated from the following file:

- database/migrations/2022\_08\_18\_182401\_create\_data\_table.php

## 8.13 CreateFailedJobsTable Class Reference

Inheritance diagram for CreateFailedJobsTable:

### Public Member Functions

- [up \(\)](#)
- [down \(\)](#)

#### 8.13.1 Member Function Documentation

##### 8.13.1.1 down()

```
CreateFailedJobsTable::down ( )
```

Reverse the migrations.

Returns

```
void
```

##### 8.13.1.2 up()

```
CreateFailedJobsTable::up ( )
```

Run the migrations.

Returns

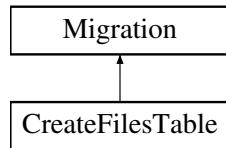

```
void
```

The documentation for this class was generated from the following file:

- database/migrations/2019\_08\_19\_000000\_create\_failed\_jobs\_table.php

## 8.14 CreateFilesTable Class Reference

Inheritance diagram for CreateFilesTable:

### Public Member Functions

- [up \(\)](#)
- [down \(\)](#)

#### 8.14.1 Member Function Documentation

##### 8.14.1.1 [down\(\)](#)

`CreateFilesTable::down ( )`

Reverse the migrations.

Returns

`void`

##### 8.14.1.2 [up\(\)](#)

`CreateFilesTable::up ( )`

Run the migrations.

Returns

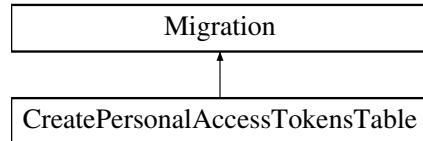

`void`

The documentation for this class was generated from the following file:

- [database/migrations/2022\\_08\\_18\\_001956\\_create\\_files\\_table.php](#)

## 8.15 CreatePersonalAccessTokensTable Class Reference

Inheritance diagram for CreatePersonalAccessTokensTable:

### Public Member Functions

- [up \(\)](#)
- [down \(\)](#)

#### 8.15.1 Member Function Documentation

##### 8.15.1.1 [down\(\)](#)

`CreatePersonalAccessTokensTable::down ( )`

Reverse the migrations.

Returns

`void`

##### 8.15.1.2 [up\(\)](#)

`CreatePersonalAccessTokensTable::up ( )`

Run the migrations.

Returns

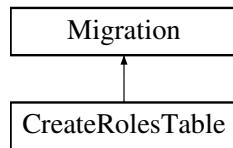

`void`

The documentation for this class was generated from the following file:

- [database/migrations/2019\\_12\\_14\\_000001\\_create\\_personal\\_access\\_tokens\\_table.php](#)

## 8.16 CreateRolesTable Class Reference

Inheritance diagram for CreateRolesTable:

### Public Member Functions

- [up \(\)](#)
- [down \(\)](#)

#### 8.16.1 Member Function Documentation

##### 8.16.1.1 [down\(\)](#)

`CreateRolesTable::down ( )`

Reverse the migrations.

Returns

`void`

##### 8.16.1.2 [up\(\)](#)

`CreateRolesTable::up ( )`

Run the migrations.

Returns

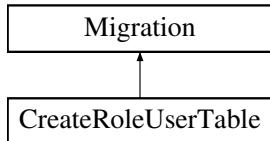

`void`

The documentation for this class was generated from the following file:

- database/migrations/[2022\\_09\\_01\\_231231\\_create\\_roles\\_table.php](#)

## 8.17 CreateRoleUserTable Class Reference

## 8.18 CreateSemestersTable Class Reference

Inheritance diagram for CreateSemestersTable:

## Public Member Functions

- [up \(\)](#)
- [down \(\)](#)

### 8.18.1 Member Function Documentation

#### 8.18.1.1 down()

```
CreateSemestersTable::down ( )
```

Reverse the migrations.

Returns

```
void
```

#### 8.18.1.2 up()

```
CreateSemestersTable::up ( )
```

Run the migrations.

Returns

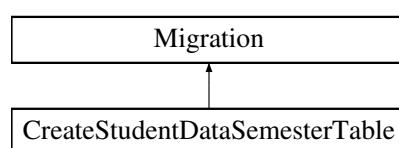

```
void
```

The documentation for this class was generated from the following file:

- database/migrations/2022\_08\_18\_182534\_create\_semesters\_table.php

## 8.19 CreateStudentDataSemesterTable Class Reference

Inheritance diagram for CreateStudentDataSemesterTable:

## Public Member Functions

- [up \(\)](#)
- [down \(\)](#)

### 8.19.1 Member Function Documentation

#### 8.19.1.1 down()

```
CreateStudentDataSemesterTable::down ( )
```

Reverse the migrations.

Returns

```
void
```

#### 8.19.1.2 up()

```
CreateStudentDataSemesterTable::up ( )
```

Run the migrations.

Returns

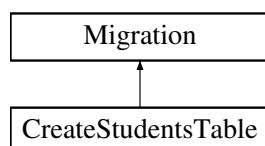

```
void
```

The documentation for this class was generated from the following file:

- database/migrations/2022\_08\_18\_185029\_create\_student\_data\_semester\_table.php

## 8.20 CreateStudentsTable Class Reference

Inheritance diagram for CreateStudentsTable:

### 8.20.1 Member Function Documentation

#### 8.20.1.1 down()

```
CreateStudentsTable::down ( )
```

#### 8.20.1.2 up()

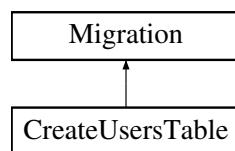

```
CreateStudentsTable::up ( )
```

The documentation for this class was generated from the following file:

- database/migrations/2022\_08\_18\_181914\_create\_students\_table.php

## 8.21 CreateUsersTable Class Reference

Inheritance diagram for CreateUsersTable:

## Public Member Functions

- [up \(\)](#)
- [down \(\)](#)

### 8.21.1 Member Function Documentation

### 8.21.1.1 down()

```
CreateUsersTable::down ( )
```

Reverse the migrations.

Returns

```
void
```

### 8.21.1.2 up()

```
CreateUsersTable::up ( )
```

Run the migrations.

Returns

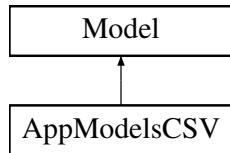

```
void
```

The documentation for this class was generated from the following file:

- database/migrations/2014\_10\_12\_000000\_create\_users\_table.php

## 8.22 App\Models\CSV Class Reference

Inheritance diagram for App\Models\CSV:

### Protected Attributes

- `$fillable`

### 8.22.1 Member Data Documentation

### 8.22.1.1 \$fillable

```
App\Models\CSV::$fillable [protected]
```

**Initial value:**

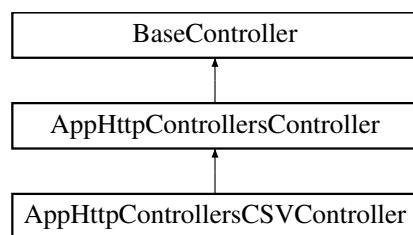

```
= [
    'uaslp_key', 'large_key', 'generation', 'name', 'career', 'status', 'creds_remaining',
    'creds_per_semester',
    'semesters_completed', 'percentage_progress', 'general_average', 'general_performance',
    'app_average', 'subjects_approved',
    'subjects_failed'
]
```

The documentation for this class was generated from the following file:

- app/Models/CSV.php

## 8.23 App\Http\Controllers\CSVController Class Reference

Inheritance diagram for App\Http\Controllers\CSVController:

### Public Member Functions

- [\\_\\_construct \(\)](#)
- [index \(Request \\$request\)](#)
- [import \(\)](#)
- [store \(Request \\$request\)](#)

### 8.23.1 Constructor & Destructor Documentation

#### 8.23.1.1 \_\_construct()

```
App\Http\Controllers\CSVController::__construct ( )
```

### 8.23.2 Member Function Documentation

### 8.23.2.1 import()

```
App\Http\Controllers\CSVController::import ( )
```

@desc Regresa la vista de importar archivo

### 8.23.2.2 index()

```
App\Http\Controllers\CSVController::index (
    Request $request )
```

### 8.23.2.3 store()

```
App\Http\Controllers\CSVController::store (
    Request $request )
```

### 8.23.2.4 updateDoc()

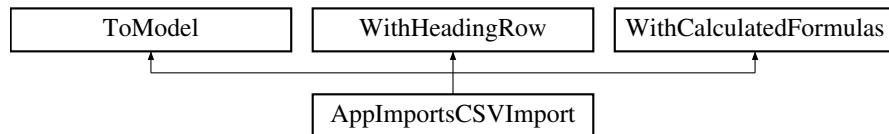

```
App\Http\Controllers\CSVController::updateDoc (
    Request $request )
```

The documentation for this class was generated from the following file:

- app/Http/Controllers/[CSVController.php](#)

## 8.24 App\Imports\CSVImport Class Reference

Inheritance diagram for App\Imports\CSVImport:

### Public Member Functions

- [model](#) (array \$row)
- [rules](#) ()

### 8.24.1 Member Function Documentation

#### 8.24.1.1 model()

```
App\Imports\CSVImport::model (  
    array $row )
```

#### 8.24.1.2 rules()

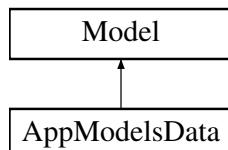

```
App\Imports\CSVImport::rules ( )
```

The documentation for this class was generated from the following file:

- app/Imports/CSVImport.php

## 8.25 App\Models\Data Class Reference

Inheritance diagram for App\Models\Data:

### Public Member Functions

- [student \(\)](#)

### Protected Attributes

- [\\$fillable](#)
- [\\$hidden](#)

### 8.25.1 Member Function Documentation

#### 8.25.1.1 student()

```
App\Models\Data::student ( )
```

## 8.25.2 Member Data Documentation

### 8.25.2.1 \$fillable

App\Models\Data::\$fillable [protected]

#### Initial value:

```
= [
    'status', 'creds_remaining', 'creds_per_semester', 'semesters_completed', 'percentage_progress',
    'general_average',
    'general_performance', 'app_average', 'subjects_approved', 'subjects_failed'
]
```

### 8.25.2.2 \$hidden

App\Models\Data::\$hidden [protected]

#### Initial value:

```
= [
    'created_at', 'updated_at', 'deleted_at'
]
```

The documentation for this class was generated from the following file:

- app/Models/[Data.php](#)

## 8.26 Database\Seeders\DatabaseSeeder Class Reference

Inheritance diagram for Database\Seeders\DatabaseSeeder:

### Public Member Functions

- [run \(\)](#)

### 8.26.1 Member Function Documentation

### 8.26.1.1 run()

```
Database\Seeder::run( )
```

Seed the application's database.

#### Returns

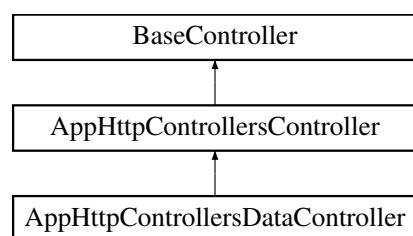

```
void
```

The documentation for this class was generated from the following file:

- database/seeders/[DatabaseSeeder.php](#)

## 8.27 App\Http\Controllers\DataController Class Reference

Inheritance diagram for App\Http\Controllers\DataController:

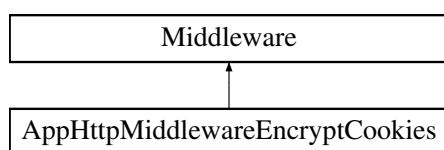

The documentation for this class was generated from the following file:

- app/Http/Controllers/[DataController.php](#)

## 8.28 App\Http\Middleware\EncryptCookies Class Reference

Inheritance diagram for App\Http\Middleware\EncryptCookies:

## Protected Attributes

- `$except`

### 8.28.1 Member Data Documentation

#### 8.28.1.1 \$except

```
App\Http\Middleware\EncryptCookies::$except [protected]
```

**Initial value:**

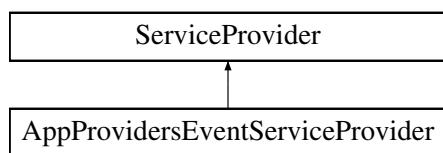

```
= [  
]
```

The documentation for this class was generated from the following file:

- app/Http/Middleware/EncryptCookies.php

## 8.29 App\Providers\EventServiceProvider Class Reference

Inheritance diagram for App\Providers\EventServiceProvider:

### Public Member Functions

- [boot\(\)](#)

### Protected Attributes

- [\\$listen](#)

#### 8.29.1 Member Function Documentation

##### 8.29.1.1 boot()

```
App\Providers\EventServiceProvider::boot( )
```

Register any events for your application.

**Returns**

`void`

## 8.29.2 Member Data Documentation

### 8.29.2.1 \$listen

```
App\Providers\EventServiceProvider::$listen [protected]
```

**Initial value:**

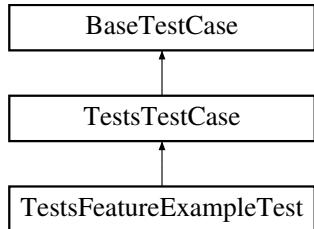

```
= [
    Registered::class => [
        SendEmailVerificationNotification::class,
    ],
]
```

The documentation for this class was generated from the following file:

- app/Providers/[EventServiceProvider.php](#)

## 8.30 Tests\Feature\ExampleTest Class Reference

Inheritance diagram for Tests\Feature\ExampleTest:

### Public Member Functions

- [test\\_example \(\)](#)

#### 8.30.1 Member Function Documentation

##### 8.30.1.1 test\_example()

```
Tests\Feature\ExampleTest::test_example ( )
```

A basic test example.

**Returns**

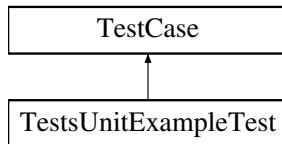

```
void
```

The documentation for this class was generated from the following file:

- tests/Feature/[ExampleTest.php](#)

## 8.31 Tests\Unit\ExampleTest Class Reference

Inheritance diagram for Tests\Unit\ExampleTest:

### Public Member Functions

- [test\\_example \(\)](#)

#### 8.31.1 Member Function Documentation

##### 8.31.1.1 test\_example()

Tests\Unit\ExampleTest::test\_example ( )

A basic test example.

Returns

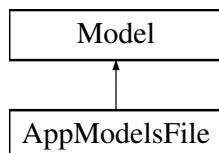

void

The documentation for this class was generated from the following file:

- tests/Unit/[ExampleTest.php](#)

## 8.32 App\Models\File Class Reference

Inheritance diagram for App\Models\File:

### Protected Attributes

- `$fillable = ['name', 'created_at']`
- `$hidden = ['updated_at', 'updated_by']`

### 8.32.1 Member Data Documentation

#### 8.32.1.1 \$fillable

```
App\Models\File::$fillable = ['name', 'created_at'] [protected]
```

#### 8.32.1.2 \$hidden

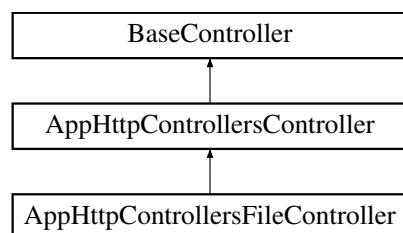

```
App\Models\File::$hidden = ['updated_at', 'updated_by'] [protected]
```

The documentation for this class was generated from the following file:

- app/Models/File.php

## 8.33 App\Http\Controllers\FileController Class Reference

Inheritance diagram for App\Http\Controllers\FileController:

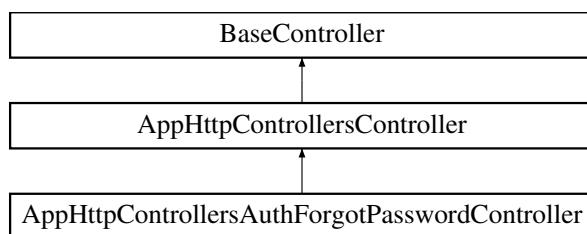

The documentation for this class was generated from the following file:

- app/Http/Controllers/FileController.php

## 8.34 App\Http\Controllers\Auth\ForgotPasswordController Class Reference

Inheritance diagram for App\Http\Controllers\Auth\ForgotPasswordController:

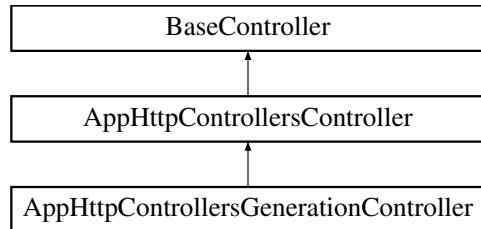

The documentation for this class was generated from the following file:

- app/Http/Controllers/Auth/ForgotPasswordController.php

## 8.35 App\Http\Controllers\GenerationController Class Reference

Inheritance diagram for App\Http\Controllers\GenerationController:

### Public Member Functions

- [loadGeneration](#) (Request \$request)

#### 8.35.1 Member Function Documentation

##### 8.35.1.1 [loadGeneration\(\)](#)

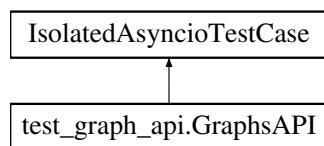

```
App\Http\Controllers\GenerationController::loadGeneration (
    Request $request )
```

The documentation for this class was generated from the following file:

- app/Http/Controllers/[GenerationController.php](#)

## 8.36 test\_graph\_api.GraphsAPI Class Reference

Inheritance diagram for test\_graph\_api.GraphsAPI:

### Public Member Functions

- None [setUp](#) (self)
- def [test\\_bar\\_plot](#) (self, mock\_get\_dataframe)

## Public Attributes

- [student\\_list](#)
- [client](#)

## 8.36.1 Member Function Documentation

### 8.36.1.1 `setUp()`

```
None test_graph_api.GraphsAPI.setUp (
    self )
```

### 8.36.1.2 `test_bar_plot()`

```
def test_graph_api.GraphsAPI.test_bar_plot (
    self,
    mock_get_dataframe )
```

Test the function that generates the lag graph.

## 8.36.2 Member Data Documentation

### 8.36.2.1 `client`

```
test_graph_api.GraphsAPI.client
```

### 8.36.2.2 `student_list`

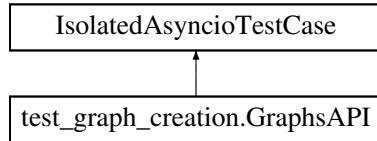

```
test_graph_api.GraphsAPI.student_list
```

The documentation for this class was generated from the following file:

- tests/Feature/[test\\_graph\\_api.py](#)

## 8.37 test\_graph\_creation.GraphsAPI Class Reference

Inheritance diagram for test\_graph\_creation.GraphsAPI:

### Public Member Functions

- None [setUp](#) (*self*)
- def [test\\_get\\_dataframe](#) (*self*)
- def [test\\_lag\\_graph](#) (*self*, *mock\_get\_dataframe*)
- def [test\\_process\\_graph](#) (*self*, *mock\_get\_dataframe*)

### Public Attributes

- [student\\_list](#)

#### 8.37.1 Member Function Documentation

##### 8.37.1.1 setUp()

```
None test_graph_creation.GraphsAPI.setUp (
    self )
```

##### 8.37.1.2 test\_get\_dataframe()

```
def test_graph_creation.GraphsAPI.test_get_dataframe (
    self )
```

##### 8.37.1.3 test\_lag\_graph()

```
def test_graph_creation.GraphsAPI.test_lag_graph (
    self,
    mock_get_dataframe )
```

Test the function that generates the lag graph.

### 8.37.1.4 test\_process\_graph()

```
def test_graph_creation.GraphsAPI.test_process_graph (
    self,
    mock_get_dataframe )
```

Test the function that processes the graph.

## 8.37.2 Member Data Documentation

### 8.37.2.1 student\_list

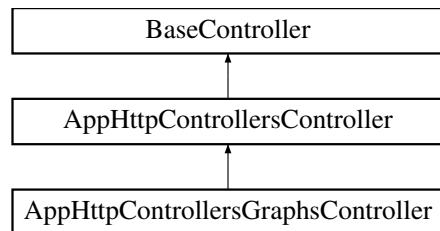

```
test_graph_creation.GraphsAPI.student_list
```

The documentation for this class was generated from the following file:

- tests/Feature/[test\\_graph\\_creation.py](#)

## 8.38 App\Http\Controllers\GraphsController Class Reference

Inheritance diagram for App\Http\Controllers\GraphsController:

## Public Member Functions

- [`\_\_construct \(\)`](#)
- [`index \(Request \$request\)`](#)
- [`loadSemester \(Request \$request\)`](#)
- [`create \(\)`](#)
- [`store \(Request \$request\)`](#)
- [`show \(\$id\)`](#)
- [`edit \(\$id\)`](#)
- [`update \(Request \$request, \$id\)`](#)
- [`destroy \(\$id\)`](#)

### 8.38.1 Constructor & Destructor Documentation

#### 8.38.1.1 \_\_construct()

```
App\Http\Controllers\GraphsController::__construct ( )
```

Display a listing of the resource.

##### Returns

```
\Illuminate\Http\Response
```

### 8.38.2 Member Function Documentation

#### 8.38.2.1 create()

```
App\Http\Controllers\GraphsController::create ( )
```

Show the form for creating a new resource.

##### Returns

```
\Illuminate\Http\Response
```

#### 8.38.2.2 destroy()

```
App\Http\Controllers\GraphsController::destroy (
    $id )
```

Remove the specified resource from storage.

##### Parameters

int	\$id	
-----	------	--

##### Returns

```
\Illuminate\Http\Response
```

### 8.38.2.3 edit()

```
App\Http\Controllers\GraphsController::edit (
    $id )
```

Show the form for editing the specified resource.

#### Parameters

int	\$id	
-----	------	--

#### Returns

\Illuminate\Http\Response

### 8.38.2.4 index()

```
App\Http\Controllers\GraphsController::index (
    Request $request )
```

### 8.38.2.5 loadSemester()

```
App\Http\Controllers\GraphsController::loadSemester (
    Request $request )
```

### 8.38.2.6 show()

```
App\Http\Controllers\GraphsController::show (
    $id )
```

Display the specified resource.

#### Parameters

int	\$id	
-----	------	--

#### Returns

\Illuminate\Http\Response

### 8.38.2.7 store()

```
App\Http\Controllers\GraphsController::store (
    Request $request )
```

Store a newly created resource in storage.

#### Parameters

\Illuminate\Http\Request	\$request	
--------------------------	-----------	--

#### Returns

\Illuminate\Http\Response

### 8.38.2.8 update()

```
App\Http\Controllers\GraphsController::update (
    Request $request,
    $id )
```

Update the specified resource in storage.

#### Parameters

\Illuminate\Http\Request	\$request	
int	\$id	

#### Returns

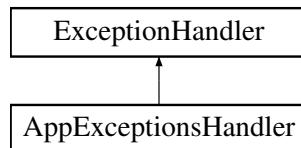

\Illuminate\Http\Response

The documentation for this class was generated from the following file:

- app/Http/Controllers/[GraphsController.php](#)

## 8.39 App\Exceptions\Handler Class Reference

Inheritance diagram for App\Exceptions\Handler:

## Public Member Functions

- [register \(\)](#)

## Protected Attributes

- [\\$dontReport](#)
- [\\$dontFlash](#)

### 8.39.1 Member Function Documentation

#### 8.39.1.1 register()

```
App\Exceptions\Handler::register ( )
```

Register the exception handling callbacks for the application.

##### Returns

```
void
```

### 8.39.2 Member Data Documentation

#### 8.39.2.1 \$dontFlash

```
App\Exceptions\Handler::$dontFlash [protected]
```

##### Initial value:

```
= [  
    'current_password',  
    'password',  
    'password_confirmation',  
]
```

#### 8.39.2.2 \$dontReport

```
App\Exceptions\Handler::$dontReport [protected]
```

##### Initial value:

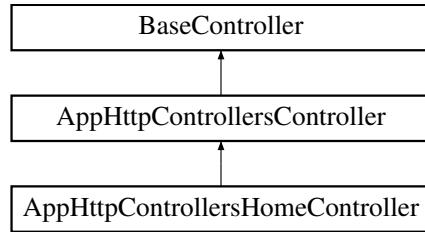

```
= [  
]
```

The documentation for this class was generated from the following file:

- app/Exceptions/Handler.php

## 8.40 App\Http\Controllers\HomeController Class Reference

Inheritance diagram for App\Http\Controllers\HomeController:

### Public Member Functions

- [\\_\\_construct \(\)](#)
- [index \(\)](#)

#### 8.40.1 Constructor & Destructor Documentation

##### 8.40.1.1 \_\_construct()

```
App\Http\Controllers\HomeController::__construct ( )
```

#### 8.40.2 Member Function Documentation

##### 8.40.2.1 index()

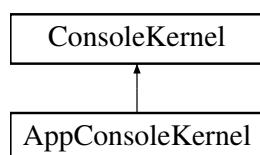

```
App\Http\Controllers\HomeController::index ( )
```

The documentation for this class was generated from the following file:

- app/Http/Controllers/[HomeController.php](#)

## 8.41 App\Console\Kernel Class Reference

Inheritance diagram for App\Console\Kernel:

## Protected Member Functions

- [schedule](#) (Schedule \$schedule)
- [commands](#) ()

### 8.41.1 Member Function Documentation

#### 8.41.1.1 commands()

```
App\Console\Kernel::commands ( ) [protected]
```

Register the commands for the application.

##### Returns

void

#### 8.41.1.2 schedule()

```
App\Console\Kernel::schedule (
    Schedule $schedule ) [protected]
```

Define the application's command schedule.

##### Parameters

\Illuminate\Console\Scheduling\Schedule	\$schedule	
---	------------	--

##### Returns

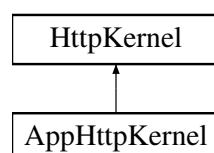

void

The documentation for this class was generated from the following file:

- app\Console\Kernel.php

## 8.42 App\Http\Kernel Class Reference

Inheritance diagram for App\Http\Kernel:

## Protected Attributes

- `$middleware`
- `$middlewareGroups`
- `$routeMiddleware`

### 8.42.1 Member Data Documentation

#### 8.42.1.1 \$middleware

```
App\Http\Kernel::$middleware [protected]
```

**Initial value:**

```
= [
    \App\Http\Middleware\TrustProxies::class,
    \Fruitcake\Cors\HandleCors::class,
    \App\Http\Middleware\PreventRequestsDuringMaintenance::class,
    \Illuminate\Foundation\Http\Middleware\ValidatePostSize::class,
    \App\Http\Middleware\TrimStrings::class,
    \Illuminate\Foundation\Http\Middleware\ConvertEmptyStringsToNull::class,
]
```

#### 8.42.1.2 \$middlewareGroups

```
App\Http\Kernel::$middlewareGroups [protected]
```

**Initial value:**

```
= [
    'web' => [
        \App\Http\Middleware\EncryptCookies::class,
        \Illuminate\Cookie\Middleware\AddQueuedCookiesToResponse::class,
        \Illuminate\Session\Middleware\StartSession::class,
        \Illuminate\View\Middleware\ShareErrorsFromSession::class,
        \App\Http\Middleware\VerifyCsrfToken::class,
        \Illuminate\Routing\Middleware\SubstituteBindings::class,
    ],
    'api' => [
        'throttle:api',
        \Illuminate\Routing\Middleware\SubstituteBindings::class,
    ],
]
```

#### 8.42.1.3 \$routeMiddleware

```
App\Http\Kernel::$routeMiddleware [protected]
```

**Initial value:**

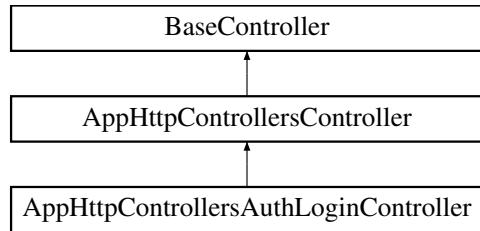

```
= [
    'auth' => \App\Http\Middleware\Authenticate::class,
    'auth.basic' => \Illuminate\Auth\Middleware\AuthenticateWithBasicAuth::class,
    'cache.headers' => \Illuminate\Http\Middleware\SetCacheHeaders::class,
    'can' => \Illuminate\Auth\Middleware\Authorize::class,
    'guest' => \App\Http\Middleware\RedirectIfAuthenticated::class,
    'password.confirm' => \Illuminate\Auth\Middleware\RequirePassword::class,
    'signed' => \Illuminate\Routing\Middleware\ValidateSignature::class,
    'throttle' => \Illuminate\Routing\Middleware\ThrottleRequests::class,
    'verified' => \Illuminate\Auth\Middleware\EnsureEmailIsVerified::class,
    'check.role' => \App\Http\Middleware\CheckRole::class,
]
```

The documentation for this class was generated from the following file:

- [app/Http/Kernel.php](#)

## 8.43 App\Http\Controllers\Auth\LoginController Class Reference

Inheritance diagram for App\Http\Controllers\Auth\LoginController:

### Public Member Functions

- [\\_\\_construct \(\)](#)

### Protected Attributes

- `$redirectTo` = RouteServiceProvider::HOME

#### 8.43.1 Constructor & Destructor Documentation

##### 8.43.1.1 \_\_construct()

App\Http\Controllers\Auth\LoginController::\_\_construct ( )

Crear nueva instancia del controlador

Returns

void

#### 8.43.2 Member Data Documentation

##### 8.43.2.1 \$redirectTo

App\Http\Controllers\Auth\LoginController::\$redirectTo = RouteServiceProvider::HOME [protected]

The documentation for this class was generated from the following file:

- app/Http/Controllers/Auth/LoginController.php

## 8.44 Migration Class Reference

### Public Member Functions

- [up\(\)](#)
- [down\(\)](#)

#### 8.44.1 Member Function Documentation

##### 8.44.1.1 down()

```
Migration::down ( )
```

Reverse the migrations.

###### Returns

void

##### 8.44.1.2 up()

```
Migration::up ( )
```

Run the migrations.

###### Returns

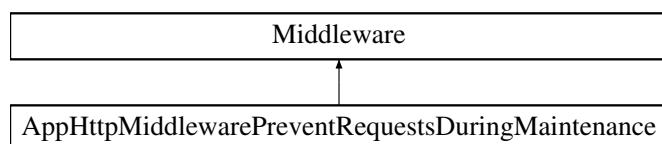

void

The documentation for this class was generated from the following file:

- database/migrations/2014\_10\_12\_100000\_create\_password\_resets\_table.php

## 8.45 App\Http\Middleware\PreventRequestsDuringMaintenance Class Reference

Inheritance diagram for App\Http\Middleware\PreventRequestsDuringMaintenance:

## Protected Attributes

- `$except`

### 8.45.1 Member Data Documentation

#### 8.45.1.1 \$except

```
App\Http\Middleware\PreventRequestsDuringMaintenance::$except [protected]
```

##### Initial value:

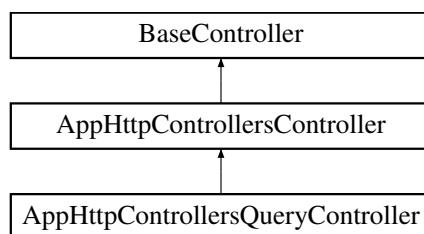

```
= [  
]
```

The documentation for this class was generated from the following file:

- [app/Http/Middleware/PreventRequestsDuringMaintenance.php](#)

## 8.46 App\Http\Controllers\QueryController Class Reference

Inheritance diagram for App\Http\Controllers\QueryController:

## Public Member Functions

- [loadQuery \(Request \\$request\)](#)

### 8.46.1 Member Function Documentation

#### 8.46.1.1 loadQuery()

```
App\Http\Controllers\QueryController::loadQuery (  
    Request $request  
)
```

The documentation for this class was generated from the following file:

- [app/Http/Controllers/QueryController.php](#)

## 8.47 App\Http\Middleware\RedirectIfAuthenticated Class Reference

### Public Member Functions

- [handle \(Request \\$request, Closure \\$next,... \\$guards\)](#)

#### 8.47.1 Member Function Documentation

##### 8.47.1.1 handle()

```
App\Http\Middleware\RedirectIfAuthenticated::handle (
    Request $request,
    Closure $next,
    $guards )
```

Handle an incoming request.

#### Parameters

\Illuminate\Http\Request	<code>\$request</code>	

Closure(\Illuminate\Http\Request): (\Illuminate\Http\Response|\Illuminate\Http\RedirectResponse) \$next

#### Parameters

<code>string null</code>	<code>...\$guards</code>
--------------------------	--------------------------

#### Returns

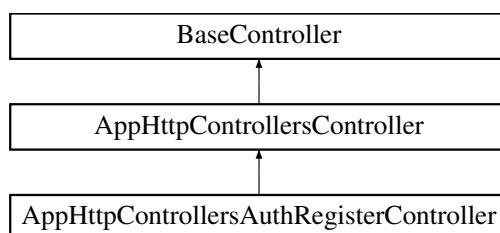

\Illuminate\Http\Response|\Illuminate\Http\RedirectResponse

The documentation for this class was generated from the following file:

- app/Http/Middleware/[RedirectIfAuthenticated.php](#)

## 8.48 App\Http\Controllers\Auth\RegisterController Class Reference

Inheritance diagram for App\Http\Controllers\Auth\RegisterController:

## Public Member Functions

- [\\_\\_construct \(\)](#)

## Protected Member Functions

- [validator \(array \\$data\)](#)
- [create \(array \\$data\)](#)

## Protected Attributes

- [\\$redirectTo = RouteServiceProvider::HOME](#)

### 8.48.1 Constructor & Destructor Documentation

#### 8.48.1.1 \_\_construct()

```
App\Http\Controllers\Auth\RegisterController::__construct ( )
```

Create a new controller instance.

##### Returns

void

### 8.48.2 Member Function Documentation

#### 8.48.2.1 create()

```
App\Http\Controllers\Auth\RegisterController::create (
    array $data )  [protected]
```

Create a new user instance after a valid registration.

##### Parameters

array	\$data	
-------	--------	--

##### Returns

\App\Models\User

### 8.48.2.2 validator()

```
App\Http\Controllers\Auth\RegisterController::validator (
    array $data ) [protected]
```

Get a validator for an incoming registration request.

#### Parameters

array	\$data	
-------	--------	--

#### Returns

\Illuminate\Contracts\Validation\Validator

## 8.48.3 Member Data Documentation

### 8.48.3.1 \$redirectTo

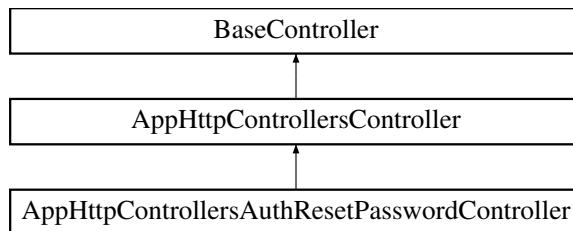

```
App\Http\Controllers\Auth\RegisterController::$redirectTo = RouteServiceProvider::HOME [protected]
```

The documentation for this class was generated from the following file:

- app/Http/Controllers/Auth/RegisterController.php

## 8.49 App\Http\Controllers\Auth\ResetPasswordController Class Reference

Inheritance diagram for App\Http\Controllers\Auth\ResetPasswordController:

## Protected Attributes

- `$redirectTo` = RouteServiceProvider::HOME

## 8.49.1 Member Data Documentation

### 8.49.1.1 \$redirectTo

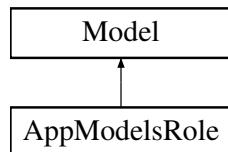

```
App\Http\Controllers\Auth\ResetPasswordController::$redirectTo = RouteServiceProvider::HOME  
[protected]
```

The documentation for this class was generated from the following file:

## 8.50.1 Member Function Documentation

### 8.50.1.1 users()

```
App\Models\Role::users( )
```

## 8.50.2 Member Data Documentation

### 8.50.2.1 \$fillable

```
App\Models\Role::$fillable [protected]
```

**Initial value:**

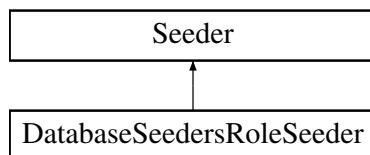

```
= [  
    'name', 'description'  
]
```

The documentation for this class was generated from the following file:

- app/Models/[Role.php](#)

## 8.51 Database\Seeders\RoleSeeder Class Reference

Inheritance diagram for Database\Seeders\RoleSeeder:

### Public Member Functions

- [run \(\)](#)

#### 8.51.1 Member Function Documentation

##### 8.51.1.1 run()

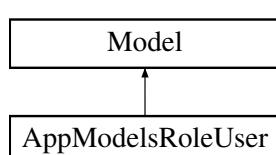

```
Database\Seeders\RoleSeeder::run ( )
```

The documentation for this class was generated from the following file:

- database/seeders/[RoleSeeder.php](#)

## 8.52 App\Models\RoleUser Class Reference

Inheritance diagram for App\Models\RoleUser:

## Public Member Functions

- `roleUsers()`

## Public Attributes

- `$timestamps = false`

## Protected Attributes

- `$table = 'role_user'`
- `$primaryKey = 'user_id'`
- `$fillable`

### 8.52.1 Member Function Documentation

#### 8.52.1.1 `roleUsers()`

```
App\Models\RoleUser::roleUsers( )
```

### 8.52.2 Member Data Documentation

#### 8.52.2.1 `$fillable`

```
App\Models\RoleUser::$fillable [protected]
```

##### Initial value:

```
= [  
    'user_id', 'role_id'  
]
```

#### 8.52.2.2 `$primaryKey`

```
App\Models\RoleUser::$primaryKey = 'user_id' [protected]
```

### 8.52.2.3 \$table

```
App\Models\RoleUser::$table = 'role_user' [protected]
```

### 8.52.2.4 \$timestamps

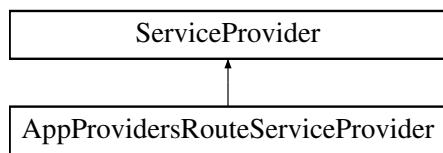

```
App\Models\RoleUser::$timestamps = false
```

The documentation for this class was generated from the following file:

- app/Models/[RoleUser.php](#)

## 8.53 App\Providers\RouteServiceProvider Class Reference

Inheritance diagram for App\Providers\RouteServiceProvider:

### Public Member Functions

- [boot \(\)](#)

### Public Attributes

- const [HOME](#) = '/home'

### Protected Member Functions

- [configureRateLimiting \(\)](#)

## 8.53.1 Member Function Documentation

### 8.53.1.1 boot()

```
App\Providers\RouteServiceProvider::boot ( )
```

Define your route model bindings, pattern filters, etc.

Returns

```
void
```

### 8.53.1.2 configureRateLimiting()

```
App\Providers\RouteServiceProvider::configureRateLimiting ( ) [protected]
```

Configure the rate limiters for the application.

Returns

```
void
```

## 8.53.2 Member Data Documentation

### 8.53.2.1 HOME

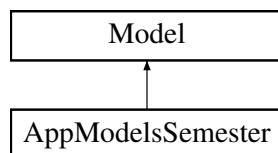

```
const App\Providers\RouteServiceProvider::HOME = '/home'
```

The documentation for this class was generated from the following file:

- app/Providers/RouteServiceProvider.php

## 8.54 App\Models\Semester Class Reference

Inheritance diagram for App\Models\Semester:

## Public Member Functions

- [data \(\)](#)

## Protected Attributes

- `$fillable`
- `$hidden`

### 8.54.1 Member Function Documentation

#### 8.54.1.1 `data()`

```
App\Models\Semester::data ( )
```

### 8.54.2 Member Data Documentation

#### 8.54.2.1 `$fillable`

```
App\Models\Semester::$fillable [protected]
```

**Initial value:**

```
= [  
    'semester'  
]
```

#### 8.54.2.2 `$hidden`

```
App\Models\Semester::$hidden [protected]
```

**Initial value:**

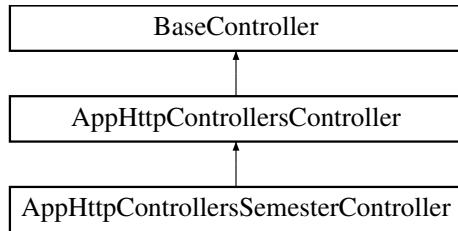

```
= [  
    'created_at', 'updated_at', 'deleted_at'  
]
```

The documentation for this class was generated from the following file:

- app/Models/Semester.php

## 8.55 App\Http\Controllers\SemesterController Class Reference

Inheritance diagram for App\Http\Controllers\SemesterController:

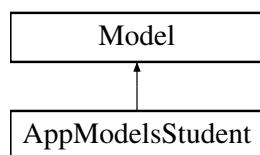

The documentation for this class was generated from the following file:

- app/Http/Controllers/[SemesterController.php](#)

## 8.56 App\Models\Student Class Reference

Inheritance diagram for App\Models\Student:

### Public Member Functions

- [data\(\)](#)
- [career\(\)](#)

### Protected Attributes

- [\\$fillable](#)
- [\\$hidden](#)

## 8.56.1 Member Function Documentation

### 8.56.1.1 career()

```
App\Models\Student::career( )
```

### 8.56.1.2 data()

```
App\Models\Student::data ( )
```

## 8.56.2 Member Data Documentation

### 8.56.2.1 \$fillable

```
App\Models\Student::$fillable [protected]
```

**Initial value:**

```
= [
    'uaslp_key', 'large_key', 'generation', 'name', 'career_id'
]
```

### 8.56.2.2 \$hidden

```
App\Models\Student::$hidden [protected]
```

**Initial value:**

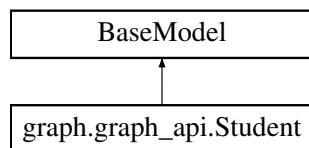

```
= [
    'created_at', 'updated_at', 'deleted_at'
]
```

The documentation for this class was generated from the following file:

- app/Models/[Student.php](#)

## 8.57 graph.graph\_api.Student Class Reference

Inheritance diagram for graph.graph\_api.Student:

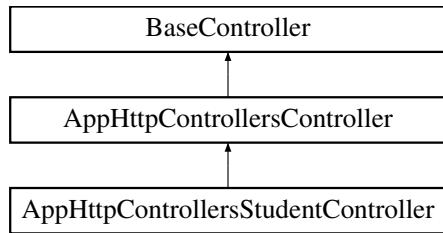

The documentation for this class was generated from the following file:

- graph/[graph\\_api.py](#)

## 8.58 App\Http\Controllers\StudentController Class Reference

Inheritance diagram for App\Http\Controllers\StudentController:

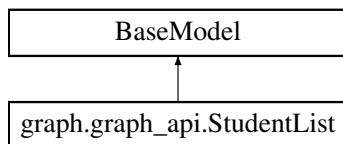

The documentation for this class was generated from the following file:

## 8.59 graph.graph\_api.StudentList Class Reference

Inheritance diagram for graph.graph\_api.StudentList:

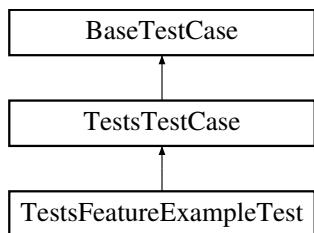

The documentation for this class was generated from the following file:

- graph/[graph\\_api.py](#)

## 8.60 Tests\TestCase Class Reference

Inheritance diagram for Tests\TestCase:

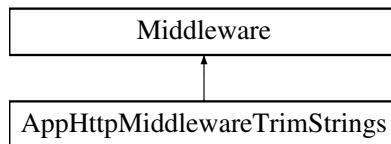

The documentation for this class was generated from the following file:

- tests/[TestCase.php](#)

## 8.61 App\Http\Middleware\TrimStrings Class Reference

Inheritance diagram for App\Http\Middleware\TrimStrings:

### Protected Attributes

- `$except`

#### 8.61.1 Member Data Documentation

##### 8.61.1.1 \$except

`App\Http\Middleware\TrimStrings::$except [protected]`

###### Initial value:

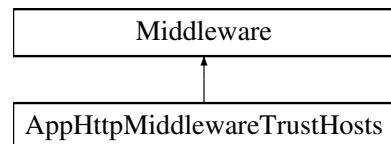

```
= [  
    'current_password',  
    'password',  
    'password_confirmation',  
]
```

The documentation for this class was generated from the following file:

- `app/Http/Middleware/TrimStrings.php`

## 8.62 App\Http\Middleware\TrustHosts Class Reference

Inheritance diagram for App\Http\Middleware\TrustHosts:

### Public Member Functions

- `hosts()`

## 8.62.1 Member Function Documentation

### 8.62.1.1 hosts()

```
App\Http\Middleware\TrustHosts::hosts ( )
```

Get the host patterns that should be trusted.

#### Returns

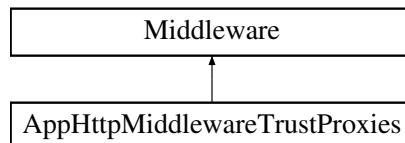

```
array<int, string|null>
```

The documentation for this class was generated from the following file:

- app/Http/Middleware/[TrustHosts.php](#)

## 8.63 App\Http\Middleware\TrustProxies Class Reference

Inheritance diagram for App\Http\Middleware\TrustProxies:

### Protected Attributes

- `$proxies`
- `$headers`

## 8.63.1 Member Data Documentation

### 8.63.1.1 \$headers

```
App\Http\Middleware\TrustProxies::$headers [protected]
```

#### Initial value:

```
= Request::HEADER_X_FORWARDED_FOR |  
Request::HEADER_X_FORWARDED_HOST |  
Request::HEADER_X_FORWARDED_PORT |  
Request::HEADER_X_FORWARDED_PROTO |  
Request::HEADER_X_FORWARDED_AWS_ELB
```

### 8.63.1.2 \$proxies

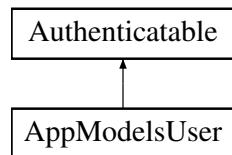

```
App\Http\Middleware\TrustProxies::$proxies [protected]
```

The documentation for this class was generated from the following file:

- app/Http/Middleware/[TrustProxies.php](#)

## 8.64 App\Models\User Class Reference

Inheritance diagram for App\Models\User:

### Public Member Functions

- [authorizeRoles \(\\$roles\)](#)
- [hasAnyRole \(\\$roles\)](#)
- [hasRole \(\\$role\)](#)
- [roles \(\)](#)

### Protected Attributes

- [\\$casts](#)
- [\\$fillable](#)
- [\\$hidden](#)

## 8.64.1 Member Function Documentation

### 8.64.1.1 authorizeRoles()

```
App\Models\User::authorizeRoles (
    $roles )
```

### 8.64.1.2 hasAnyRole()

```
App\Models\User::hasAnyRole (
    $roles )
```

### 8.64.1.3 hasRole()

```
App\Models\User::hasRole (  
    $role )
```

### 8.64.1.4 roles()

```
App\Models\User::roles ( )
```

## 8.64.2 Member Data Documentation

### 8.64.2.1 \$casts

```
App\Models\User::$casts [protected]
```

**Initial value:**

```
= [  
    'email_verified_at' => 'datetime'  
]
```

### 8.64.2.2 \$fillable

```
App\Models\User::$fillable [protected]
```

**Initial value:**

```
= [  
    'name', 'email', 'username', 'password'  
]
```

### 8.64.2.3 \$hidden

```
App\Models\User::$hidden [protected]
```

**Initial value:**

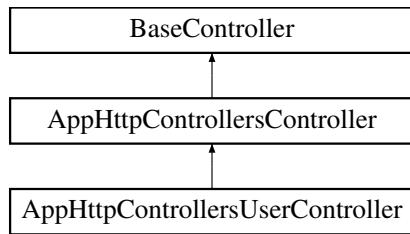

```
= [  
    'password', 'remember_token', 'two_factor_secret', 'two_factor_recovery_codes'  
]
```

The documentation for this class was generated from the following file:

- app/Models/User.php

## 8.65 App\Http\Controllers\UserController Class Reference

Inheritance diagram for App\Http\Controllers\UserController:

### Public Member Functions

- `index (Request $request)`
- `create ()`
- `edit (User $user)`
- `update (Request $request)`
- `store (Request $request)`
- `destroy (User $user)`

#### 8.65.1 Member Function Documentation

##### 8.65.1.1 create()

```
App\Http\Controllers\UserController::create ( )
```

@desc Regresa la vista de crear usuarios

##### 8.65.1.2 destroy()

```
App\Http\Controllers\UserController::destroy (
    User $user )
```

@desc Elimina un usuario @params {User} Usuario a eliminar

##### Returns

Vista index de usuario

**8.65.1.3 edit()**

```
App\Http\Controllers\UserController::edit (
    User $user )
```

@desc Regresa la vista de editar usuarios con información del usuario @params {User} El usuario a actualizar

**8.65.1.4 index()**

```
App\Http\Controllers\UserController::index (
    Request $request )
```

**8.65.1.5 store()**

```
App\Http\Controllers\UserController::store (
    Request $request )
```

@desc Guarda la información de un usuario nuevo @params {Request} Información del usuario a almacenar

**Returns**

Vista index de usuario

**8.65.1.6 update()**

```
App\Http\Controllers\UserController::update (
    Request $request )
```

@desc Guarda la nueva información de usuario existente @params {Request} Información nueva del usuario a almacenar

**Returns**

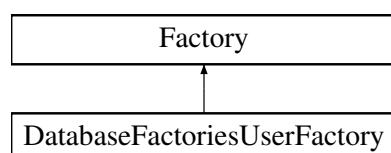

Vista index de usuario

## 8.66 Database\Factories\UserFactory Class Reference

Inheritance diagram for Database\Factories\UserFactory:

## Public Member Functions

- [definition \(\)](#)
- [unverified \(\)](#)

### 8.66.1 Member Function Documentation

#### 8.66.1.1 [definition\(\)](#)

```
Database\Factories\UserFactory::definition ( )
```

Define the model's default state.

Returns

array

#### 8.66.1.2 [unverified\(\)](#)

```
Database\Factories\UserFactory::unverified ( )
```

Indicate that the model's email address should be unverified.

Returns

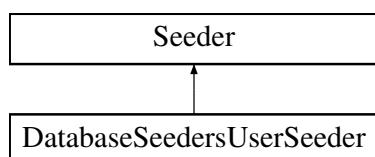

\Illuminate\Database\Eloquent\Factories\Factory

The documentation for this class was generated from the following file:

- database/factories/[UserFactory.php](#)

## 8.67 Database\Seeders\UserSeeder Class Reference

Inheritance diagram for Database\Seeders\UserSeeder:

## Public Member Functions

- [run \(\)](#)

### 8.67.1 Member Function Documentation

#### 8.67.1.1 run()

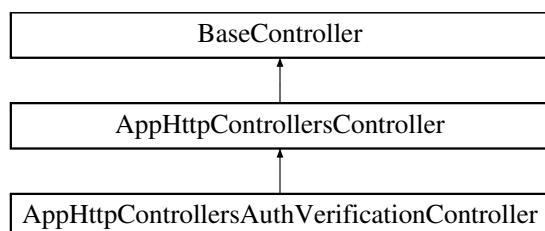

Database\Seeder\UserSeeder::run ( )

The documentation for this class was generated from the following file:

## 8.68 App\Http\Controllers\Auth\VerificationController Class Reference

Inheritance diagram for App\Http\Controllers\Auth\VerificationController:

## Public Member Functions

- [\\_\\_construct \(\)](#)

## Protected Attributes

- `$redirectTo` = RouteServiceProvider::HOME

### 8.68.1 Constructor & Destructor Documentation

### 8.68.1.1 \_\_construct()

```
App\Http\Controllers\Auth\VerificationController::__construct ( )
```

Create a new controller instance.

Returns

```
void
```

## 8.68.2 Member Data Documentation

### 8.68.2.1 \$redirectTo

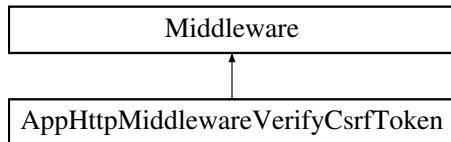

```
App\Http\Controllers\Auth\VerificationController::$redirectTo = RouteServiceProvider::HOME  
[protected]
```

The documentation for this class was generated from the following file:

- app/Http/Controllers/Auth/VerificationController.php

## 8.69 App\Http\Middleware\VerifyCsrfToken Class Reference

Inheritance diagram for App\Http\Middleware\VerifyCsrfToken:

### Protected Attributes

- \$except

## 8.69.1 Member Data Documentation

### 8.69.1.1 \$except

```
App\Http\Middleware\VerifyCsrfToken::$except [protected]
```

**Initial value:**

```
= []
```

The documentation for this class was generated from the following file:

- app/Http/Middleware/VerifyCsrfToken.php
